C++ Programming Char Arrays Homework 2

Mostafa S. Ibrahim Teaching, Training and Coaching since more than a decade!

Artificial Intelligence & Computer Vision Researcher PhD from Simon Fraser University - Canada Bachelor / Msc from Cairo University - Egypt Ex-(Software Engineer / ICPC World Finalist)

Problem #1: Compressing

- Read a string of letters and then compress each group of same letter
 - E.g. if the sub-string is $cccc \Rightarrow c4$
 - Use _ between each group
- Input ⇒ Outputs
 - o ccccDDDxxxxxxxxxxe ⇒ c4_D3_x8_e1
 - \circ xxxxxxxx \Rightarrow x8

Problem #2: Compare strings

- Read 2 strings, then output YES if the first smaller than or equal to second.
 Otherwise, output NO
 - Don't use < operator to compare strings. Use loops
- Input ⇒ Output
 - aaa aaa ⇒ YES
 - aaaaa aa ⇒ NO
 - o abc d ⇒ YES
 - o dddddddddddd xyz ⇒ YES
 - azzzzzzzz za ⇒ YES
 - o za azzzzzzzz ⇒ NO

Problem #3: Add 5555

- Read a very long string of digits (at least 6 digits), and add 5555 to it.
 - o Don't convert to integer, as integer has max limit for values
- Input ⇒ Outputs

"Acquire knowledge and impart it to the people."

"Seek knowledge from the Cradle to the Grave."
